The London Gazette.

Published by Authority.

From Saturday April 21, to Tuesday April 24, 1753.

Lisbon, March 15.

THE Court is ſtill at Salvaterra, where great Preparations are making for celebrating, on Monday next, the Feaſt of St. Joſeph, whoſe Name the King bears. They are actually drawing up the Marriage Contract between the Infanta Marie-Anne-Francoiſe, and the Archduke Joſeph, their Imperial Majeſties eldeſt Son. The King having been informed, that the new Regulations, which were made with regard to the Mines in the Braſils, have not been attended with the Advantages that were expected, has ſent Orders to the Governor of that Country, to ſuſpend the further Execution of them. We hear his Majeſty has obtained a Bull of the Pope for ſuppreſſing the Endowments made by the late King to the Patriarchal Church of this City, amounting, in the Whole, to upwards of Two Millions of Cruſades a Year. By the laſt Letters from Rio de Janeiro we have Advice, that the Inhabitants of the Colony of St. Sacrament ſhew great Reluctance to live under the Spaniſh Government, which they are obliged to by the late Treaty of Exchange between the two Crowns; that they have committed great Outrages on the Occaſion, and have even a ſecond Time deſtroyed the Land Marks that were ſet up by Order of the Spaniſh Governor. When theſe Letters came away no violent Methods had been taken, but 'twas thought nothing but Force of Arms would oblige them to ſubmit.

Rome, March 27. On Sunday laſt the Duke and Dutcheſs of Wirtembourg arrived here with a numerous Retinue; they propoſe ſtaying till the End of next Month, and then return to Germany. The Ratification of the Agreement between this Court and that of Madrid, in relation to the Nomination to Benefices in the Kingdom of Spain, is oppoſed by ſeveral Members of the Sacred College, ſo that 'tis even doubted whether that Agreement will ever be carried into Execution.

Mantua, March 30. Prince Eſterhaſi, heretofore Ambaſſador from their Imperial Majeſties to the King of the Two Sicilies, arrived here, with a numerous Retinue, on Sunday laſt from Milan, and ſet out the next Day for Venice, where he propoſes to ſtop for a few Days, and then to proceed on his Journey to Vienna. Laſt Monday died here one Innocent Bozoli, aged 110 Years and ſome Months; he was born at Stellata, a little Town in the Dutchy of Ferrara, and was by Profeſſion a Fiſherman, which laborious Employment he followed till within a few Days of his Death.

Warſaw, March 30. Upon Advice that a large Quantity of Foreign Coin, mixed with baſe Metal, had been lately brought to Dantzick, Count Malachowſky, Great Chancellor of the Crown, has wrote to the Magiſtrates of that City, requeſting them to uſe all neceſſary Precautions to prevent its Circulation; and proper Methods are taking at the ſame Time to prevent all Specie, of that Kind, being circulated in Poland.

Stockholm, April 4. The Prince Royal, who a few Days ago was ſeized with a feveriſh Diſorder, is now perfectly recovered. They are very ſucceſsful in raiſing Recruits in the ſeveral Provinces of this Kingdom, in order to compleat our Troops. The Gold Mines, lately diſcovered in the Iſland of Smaland anſwers extremely well, and Orders are given for encreaſing the Number of Hands employed in working them.

Copenhagen, April 7. On Saturday laſt, being the King's Birth-Day, who then entred into the 31ſt Year of his Age, the ſame was celebrated at Court with great Magnificence, but no Promotions, either Civil or Military, were made on that Occaſion. The Departure of the Court for Fredensbourg, which was fixed for the 5th, is put off to the 11th Inſtant. Yeſterday a conſiderable Sum of Money was diſtributed, by Order of his Majeſty, amongſt the poor Inhabitants of this City.

Poſnania, April 7. We are aſſured by our laſt Letters from the Frontiers of Turky, that there were great Motions amongſt the Ottoman Troops on that Side, but with what View could not be diſcovered.

Vienna,

[Price Two-Pence.]

Vienna, April 7. Her Imperial Majeſty has promoted Baron Schenck and Count Velaſco, to the Rank of Majors General; and M. de Thon is appointed Counſellor of the Aulick Council of the Empire. Prince Piccolomini, who has been confined to his Chamber for ſome Time paſt with the Gout, is now ſo well recovered, that Preparations are making for his Departure for Moravia, in order to take upon him the Government of that Province.

Dreſden, April 9. All the Officers of the Regiments appointed to form the Camp in this Neighbourhood, have received Orders to join their reſpective Corps by the 15th Inſtant.

Hambourg, April 10. The Deputies, whom the Regency of this City ſent ſome Time ſince to Vienna, having finiſhed their Commiſſion at that Court, are to have their Audience of Leave on the 14th, and to ſet out the next Day on their Return Home by the Way of Dreſden, where they are likewiſe charged with a Commiſſion to thank his Poliſh Majeſty, in the moſt ſolemn Manner, for his good Offices in procuring a Re-eſtabliſhment of our Commerce with Spain. We are informed by our laſt Letters from Petersbourg, that the Great Chancellor Count Beſtucheff was at length ſet out from thence for Moſcow.

Berlin, April 12. 'Tis ſaid the King intends to review the Regiments here in Garriſon next Monday, and that his Majeſty will ſet out for Sileſia a few Days after. The Queen, who was confined to her Apartment for ſome Days by a ſlight Fever, appears again in Publick, being quite recovered.

Duſſeldorp, April 13. On Wedneſday a Cartel was publiſhed here, for the reciprocal Exchange of Deſerters between the Elector our Sovereign, and the Landgrave of Heſſe-Darmſtadt. We are informed by our laſt Letters from Saltzbourg, that Count Sigiſmond-Chriſtopher de Schrattenbach was elected, on the 5th Inſtant, almoſt unanimouſly, Archbiſhop and Prince of that City.

Paris, April 13. The Pregnancy of Madame la Dauphine has been declared at Court. The Infanta Dutcheſs of Parma ſets out next Month on her Return Home, for which Purpoſe the Intendants of the ſeveral Provinces, through which that Princeſs is to paſs in order to her Embarcation at Antibes, have already received Orders to make the neceſſary Preparations for her Reception. On the 8th Inſtant the Deputies of the Parliament waited on the King, to know his Majeſty's Pleaſure when he would receive the Remonſtrances of his Parliament, but no Day was fixed for that Buſineſs. They write from Madrid, that the King, in order to facilitate the Remounting of his Cavalry, of which he is going to make a conſiderable Augmentation, has granted Liberty for the Purchaſing of Horſes in the different Provinces where each Regiment is quartered, without obliging the Officers to purchaſe them all, as heretofore, in Andaluſia.

Bruſſels, April 16. They are raiſing a great Number of Recruits to complete all the Regiments garriſoned in the Low-Countries. On Tueſday laſt a Battalion of the Swiſs Regiment of Planta, in the Dutch Service, arrived in the Suburbs of this City from Namur, and the next Day continued its Route for Sas-van-Gand, where it is ordered into Garriſon.

Hague, April 18. The States of this Province are ſeparated till after the Holy-Days. Yeſterday Colonel Millinere, a Gentleman in the Service of this State, died here of an Apoplectick Fit. We learn from Middlebourg, that M. van den Brande, one of the Directors of the India Company, for the Chamber of that City, died there a few Days ago.

London, March 17, 1753.

General Poſt-Office.

Whereas a Perſon of about Six Feet high, Fifty Years of Age, of a Swarthy Complexion, much pitted with the Small Pox, and wore a darkiſh coloured Coat, and a brown Bob Wig, came laſt Night, about Six of the Clock, to the Shop of Mr. Thomas Harding, Goldſmith, in the Minories, and bought of him a ſtraight bodied Silver Tankard, Weight 25 oz. 18 *dwt. with the Letters* C. D. *marked, by his Deſire, on the Handle thereof; and the ſaid Perſon having given, in Payment, for the ſaid Tankard, a* Bank Poſt Bill, *which was taken out of the Cirenceſter Mail, which was robbed on the* 18*th of April,* 1751, *and indorſed the ſaid* Bank Poſt Bill *by the Name of Charles Dew.*

This is therefore to give Notice to all Goldſmiths and others, to whom the ſaid Tankard may be offered in Sale, that whoever apprehends, or cauſes to be apprehended the Perſon above deſcribed, who is ſtrongly ſuſpected of having been a Principal, or an Accomplice in the ſaid Robbery, ſhall, upon Conviction, be entitled to a Reward of Two Hundred Pounds, *over and above the Reward given by Act of Parliament for apprehending of Highwaymen.*

By Command of the Poſt-Maſter-General,
George Shelvocke, *Secretary.*

To Make the

Lithontriptic Maſs *and* Electary.

TAKE Five Pounds of Alicant Soap, ſhaved, and One Pound of Oyſterſhell Lime; put them into a Tin Veſſel, and pour upon them Five Quarts of Water: Make the Water boil till the Soap be perfectly diſſolved in it, and then ſtrain all into a glazed earthen Veſſel. Expoſe this Maſs to the Air, ſtirring it every Day till it becomes both mild to the Taſte, and of a proper Conſiſtence to be formed into Pills or long Pellets, without ſticking to the Fingers. This may be expected to happen in Two or Three Months. If it becomes ſufficiently mild before it has acquired a due Conſiſtence, it may be brought to this by being heated over a Fire, in a Tin Veſſel: If it acquires too hard a Conſiſtence, before it be ſufficiently mild, it muſt be ſoften'd with Water. The Maſs here deſcribed is what I call the Lithontriptic Maſs. I direct a Tin Veſſel, becauſe a Braſs or Copper One would make it Emetic.

It may be prepared in a more expeditious Manner, as follows; (but, where Time can be allow'd for it, I prefer the foregoing) Pour Two Gallons of Water upon a Pound of Oyſterſhell Lime, ſtir it two or three Times, and when it has fallen to the Bottom, pour off

off the clear Part of the Water. Repeat this fifteen or twenty Times, or till the clear Water, which is poured off, be almoſt taſteleſs, leaving about Five Pints of Water upon the Lime, after the laſt Ablution: Then pour this Mixture of Water and dulcified Lime upon Five Pounds of Alicant Soap, ſhaved, and proceed as above directed. The Maſs thus prepared will be fit for Uſe in a few Days, or even immediately.

If the Maſs of Soap and Oyſterſhell Lime, dulcified in either of the above-mentioned Ways, be made of the Conſiſtence of an Electary, I call it the Lithontriptic Electary. This Form is more convenient than the Maſs, for thoſe who deſire to take the Medicine diſſolved in a liquid Vehicle: The moſt ſuitable ones are Milk, Water ſweeten'd with Honey or Sugar, Water flavour'd with Wine, Brandy, or Rum, and Small-Beer.

Where a Perſon is ſuppoſed to have a large Stone in the Kidney or Bladder, he ought to take every Day as much of the Lithontriptic Maſs, or Electary, as contains two Ounces of the Soap, unleſs his Pain and Provocation to make Water be violent; in which Caſe it will be proper to begin with about Half this Quantity, and to increaſe it as he can bear. The Medicine ought alſo, in this Caſe, to be dulcified in an extraordinary Degree.

The Generation of Gravel and Gravel-Stones may be entirely prevented by this Medicine: It is likewiſe of great Service in Diſorders of the Stomach and Bowels, ariſing from, or attended with Acidities there, and in gouty Habits. The Patient may, in any of theſe Caſes, begin with ſuch a Quantity every Day, as contains an Ounce of Soap, and afterwards increaſe or leſſen his Quantity as he finds Occaſion.
